Why Floor Matting

As the leader in the Western United States our primary objective is to make businesses understand **the importance of floor matting through education.**

The single most important risk to any enterprise is **worker safety**. To make sure at the end of the day every **employee returns home safe.**

As the times progressed so has the matting industry. **More specialized mats** have been introduced for numerous applications.

Mats have **wide array of applications** and a **paramount acceptability** in commercial and industrial sectors

We will do our best to **provide information and education regarding different mat types and their applications.**

Commercial Mats

- These mats are widely known as entrance mats
- Primarily they trap dirt and moisture from entering the building
- More than 75 % of debris will be scraped and wiped off from the shoes
- Commonly made of cut pile carpet, offers good water retention reducing slip hazard
- This will naturally protect the expensive flooring and minimize the wear and tear
- Add warmth and beauty to the building by adding logos and messages etc.
- Also assist in improving air quality by reducing dust

Anti-Fatigue Mats

- Anti-fatigue mats are designed to reduce tiredness and stress on the feet, knees, legs, and lower back for workers who stand in one position for long periods of time
- All assembly lines or production facilities are a good example
- These mats are usually made of sponge, rubber and rarely gel to absorb shock while working
- Helps improve worker safety and increases productivity
- Good for Reduction of liability and worker compensation

Wet Area Mats

- This is a drain through matting where there is a large flow of water
- Most of these mats are slip resistant and widely used around swimming areas and saunas
- Mostly made of PVC or Rubber so they can be easily hosed off and inhibits bacterial growth
- Some of these mats may also have anti-fatigue properties such as kitchen mats
- Public showers are a must to avoid slip hazard and reduce liability

Anti-Static Mats

- These mats are needed to protect from damaging electronic devices from static charge
- Anti-static property also prevents the incidence of sparks caused by static
- Mat usually includes a cable to be grounded
- Ideally suited for Test and Electronic Stations, Computer Workstations and all places where (Electro-Static Discharge) or ESD Matting is a must
